# Data Collect Pro™

## INNOVATIVE COLLECTIONS SOFTWARE FOR CORPORATE LEGAL AND COMPLIANCE TEAMS

**Data Collect Pro™** is a cloud-based data collections solution designed to enable corporate legal and compliance teams to quickly and easily collect and preserve data for litigation and compliance matters in a forensically-sound manner with minimal business disruption and cost.

### Defensibly collect data

Collect data using a documented, defensible and forensically-sound collections process that anyone — even non-technical users — can confidently execute.

### Reduce data volumes with targeted collections

Apply search filters to cull content before it is collected, dramatically reducing data volumes and cutting costs associated with subsequent data process and review.

### Minimize business disruption

Perform data collections with minimal custodian interaction, eliminating the need to travel to worksites or disrupt productivity.

### Gain control of the collections process

Empower your legal and compliance teams to take control of the data collections process, reducing dependence on IT support and outside services.

### Gather content from cloud repositories

Quickly collect data from a range of sources.

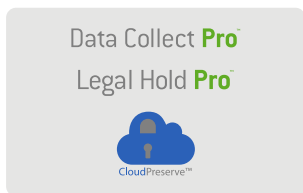

### Scale for growth

Instantly scale your storage capacity to accommodate increased demand without any upfront investments in infrastructure.

“Data Collect Pro is ideal for gathering information in a forensically sound way from email, Box and Dropbox.”

– Trent Walton, CTO U.S. Legal Support, Inc.

Z-Discovery Preservation Package gives peace of mind to corporate legal teams

Bundle Data Collect Pro™ with Legal Hold Pro™ and CloudPreserve™ to create a complete preservation and collection solution.

### Collect data from email and cloud repositories

- Email – Exchange, Gmail, IMAP and more
- Cloud – Office 365 Suite, Google Apps, DropBox, Box and more

### Cull data before it’s collected

- Filter collections based on date range and folders.
- Refresh past collections with new and revised content.

### Improve cross-departmental communications and workflow

- Initiate and track collections from Legal Hold Pro™.
- Collect data that has been put on hold using CloudPreserve™
- Send data into Digital Discovery Pro™ for review and production.

### Get scalability and security at an unprecedented value

- Leverage cloud-based architecture to scale rapidly without investing in infrastructure.
- Rest assured your data is protected by industry-leading security practices and SOC 2® Type 2 Certification, which demonstrates adherence to information security, availability, integrity, confidentiality, and privacy best practices.
