RAPID REVIEW AND PRODUCTION FOR CORPORATE LEGAL TEAMS

Digital Discovery Pro™ is a powerful yet intuitive legal review solution that empowers corporate legal and compliance teams to rapidly process, review and produce data for litigation, regulatory and compliance matters with ease.

Review routine matters in-house

- Empower your team to process, review and produce data for a broad range of litigation, compliance and regulatory matters.
- Easily zero-in on documents of interest for internal investigations, regulatory and information requests, early case assessments, and first pass review.

Get instant insights into matters

- Rapidly process datasets of any size via a scalable and elastic cloud infrastructure.
- Get immediate access to files for review without waiting for the entire batch to be uploaded and processed.

Reduce review & processing costs

- Intelligently cull data sets before ingestion to reduce data volumes.
- Save costs and time by conducting in-house review and production for internal investigations, FOIA requests, regulatory responses and small litigation matters.
- Conduct early case assessments and first pass reviews of data in-house before sending to outside counsel.

Scale for growth in a secure environment

- Leverage cloud-based architecture to scale rapidly without investing in infrastructure.
- Rest assured your data is protected by industry-leading security practices and SOC 2® Type 2 certification, which demonstrates adherence to information security, availability, integrity, confidentiality and privacy best practices.

“Digital Discovery Pro empowers our legal and compliance teams to do more review in-house, which has cut costs dramatically.”

– Director of E-Discovery at a Fortune 500 Media Company

Processing

- Upload files, folders and containers through a web browser, Data Collect Pro™ or a direct Amazon Web Services® (AWS) upload.
- Encrypt documents in transit and at rest for maximum security.
- DeNIST files and de-dupe files to reduce data volumes.
- Apply optical character recognition (OCR) to process documents without extractable text.

Review

- Start reviewing documents in a near-native viewer within seconds after processing.
- Search and filter by date range, keyword, phrase, tag, custodian and more.
- Use flexible tagging features to organize and understand your case.
- View highlighted keyword hits within documents.
- Redact and tag sensitive, personal or privileged information.
- View insightful reports on the dashboard and drill down for details.

Production

- Export entire document sets or subsets of data.
- Produce documents in native, TIFF, PDF and mixed-mode formats.
- Apply Bates stamping and endorsements to exported documents.
- Conduct a “smart export” of redacted documents to prevent accidental information disclosure.

Ease of use

- Be up and running in hours — not weeks — with intuitive, friendly software.
- Receive dedicated customer support during implementation and free training and support for the lifetime of your account.

ABOUT ZAPPROVED

Zapproved is a pioneering leader in cloud-based e-discovery software for corporate legal and compliance departments. Our suite of intuitive and scalable solutions empowers teams to seamlessly and defensibly initiate legal holds and collect, process and review data with ease.
